

NantHealth Overview

ABOUT

NantHealth provides enterprise solutions that help businesses transform complex data into actionable insights.

By delivering efficient ways to move, interpret, and visualize complex and highly sensitive information, NantHealth's SaaS products help its customers automate, understand, and act on data across their businesses.

KEY PRODUCTS

 **NantHealth** | **NaviNet**

NaviNet® is a suite of SaaS-based solutions enabling payers and providers to streamline communication and consolidate information, while gaining access to a richer set of data to improve patient care. **NaviNet Open** is a secure, multi-payer platform that normalizes data enabling more efficiency and better collaboration for sharing vital clinical and population health management information in near real time. **NaviNet AllPayer** is a subscription-based platform that gives providers access to eligibility and benefit information for over 1,000 commercial, and Medicaid and Medicare plans.
